

Marked-up version of original ABSTRACT

An appliqué for the skin that includes an elastically deformable woven fabric having an imperforate, tacky gel coating on one side thereof. The fabric is preferably woven from a thread comprising an elastic polyester or polyether fiber such as **Spandex** SPANDEX[®]. The gel coating, which is applied to one side of the fabric, is preferably silicone gel. The appliqué may be used as a wound dressing ~~or as a drug-delivery system for administering a medicament transdermally such as, for example, for~~ ~~scar management.~~
